KỲ THI TUYỂN SINH LỚP 10 THPT CHUYỂN NGOẠI NGỮ NĂM 2010
ĐỀ THI MÔN: TIẾNG ANH (CHUYỂN)
Thời gian làm bài: 120 phút (Không kể thời gian phát đề)
(Dề thi gồm 04 trang. Thi sinh làm bài trên PHIEU TRẢ LỜI)

I. Câu 01-05: Chọn từ (ứng với A, B, C hoặc D) có phiên âm được của khác với những từ còn lại trong mỗi câu.

01. A. bomb B. problem C. hot D. tomb
02. A. hurt B. dgnate C. many D. áxe
03. A. perhaps B. comb C. complain D. suggest
04. A. computer B. sustain C. succeed D. medicine
05. A. tyre B. furniture C. terminal D. modify

II. Câu 06-10: Chọn từ (ứng với A, B, C hoặc D) có trong âm chính nhận vào âm tiết có vị trí khác với những từ còn lại.

06. A. astonish B. endanger C. terminal D. medicine
07. A. industry B. impolite C. television D. untruly
08. A. unhappy B. delivery C. mistake D. bother
09. A. communicate B. idea C. interest D. experience
10. A. refer B. idea C. information D. telephone

III. Câu 11-20: Đọc đoạn văn sau và chọn phương án đúng (ứng với A, B, C hoặc D) cho mỗi câu hỏi.

The food we eat seems to have profound effects on our health. Although science has made enormous steps in making food more fit to eat, it has, at the same time, made many foods unfit to eat. Some research has shown that perhaps eighty percent of all human ills are related to diet and forty percent of cancer is related to the diet as well, especially cancer of the colon. People of different cultures are more prone to contract certain illnesses because of the characteristic foods they consume.

That food is related to illness is not a new discovery. In 1945, government researchers realized that nitrates and nitrates (commonly used to preserve color in meats) as well as other food additives caused cancer. Yet, these carcinogenic additives remain in our food, and it becomes more difficult all the time to know which ingredients on the packaging labels of processed food are helpful or harmful.

The additives that we eat are not all so direct. Farmers often give penicillin to cattle and poultry, and because of this, penicillin has been found in the milk of treated cows. Sometimes similar drugs are administered to animals not for medicinal purposes, but for financial reasons. The farmers are simply trying to fatten the animals in order to obtain a higher price on the market. Although the Food and Drug Administration (FDA) has tried repeatedly to control these procedures, the practices continue.

A healthy diet is directly related to good health. Often we are unaware of detrimental substances we ingest. Sometimes well-meaning farmers or others who do not realize the consequences add these substances to food without our knowledge.

11. How has science done a disservice to people?
   A. Because of science, disease caused by contaminated food has been virtually eradicated.
   B. It has caused a lack of information concerning the value of food.
   C. As a result of scientific intervention, some potentially harmful substances have been added to our food.
   D. The scientists have preserved the color of meats, but not of vegetables.

12. In line 2, the word “fit” is closest in meaning to __________.
   A. athletic B. suitable C. tasty D. adaptable

13. The word “prone” in line 5 is nearest in meaning to __________.
   A. supine B. healthy C. unlikely D. predisposed

14. What are nitrates used for?
   A. They preserve flavor in packaged foods.
   B. They preserve the color of meats.
   C. They are the objects of research.
   D. They cause the animals to become fatter.

15. The word “these” in line 8 refers to __________.
   A. meats B. colors C. researchers D. nitrates and nitrates
